Full-Stack Developer | Ruby | Ruby on Rails | Javascript | React |
Redux
Ntunja Township

Résumé

Full-Stack JavaScript Developer | Entrepreneur | Founder

Versatile JavaScript developer with hands-on experience in developing and building technology startups (B2B and customer-centric) by bringing together a vision, strategy, and execution in a totally unstructured and resource-constrained environment.

During my 2 years of experience in the technology field, I have gained extensive knowledge in

- Front-end development: ReactJS | JQuery
- Back-end development: NodeJS | ExpressJS | Ruby on Rails
- Databases : Postgres | MongoDB
- Stylization: SASS | CSS-in-JS | MaterialUI | Bootstrap
- Site deployment: Heroku | Netlify | Github

Passionate about ideating, conceptualizing, and producing consumer-centric technology and technology products. I'm open to exploring exciting full development opportunities in startups or large-scale companies.

Take a look at some of my work at <https://github.com/vic778>.

Looking for a developer? Let's schedule a Zoom chat! Send me an e-mail at barhvictor@gmail.com.

Expérience

Microverse
Code reviewer
mars 2022 - Present (1 mois)
